MADHUMIDHA S

Chennai, Tamil Nadu | +91 81489 95967 | madhumidhacse883@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Computer Science and Engineering graduate with hands-on experience building full-stack and AI-driven web applications using the MERN stack (React.js, Node.js, Express.js, MongoDB), Python, and REST APIs. Completed an internship and an in-plant training program delivering real-time applications end to end, following standard SDLC and Git-based version control practices. Certified in Java (NPTEL, IIT) and the MERN stack. Seeking an entry-level Software Developer role to apply strong problem-solving and full-stack development skills to production-grade projects.

EDUCATION

Velammal Engineering College **2022 – 2026**

Bachelor of Engineering, Computer Science and Engineering | CGPA: 7.53 / 10

RMK Matriculation Higher Secondary School **2021 – 2022**

Higher Secondary Certificate (HSC) | 85.17%

RMK Matriculation Higher Secondary School **2019 – 2020**

Secondary School Leaving Certificate (SSLC) | 83.60%

TECHNICAL SKILLS

Programming Languages: Java, Python, HTML5, CSS3, JavaScript, SQL (MySQL)

Web Development: React.js, React Hooks, Node.js, Express.js, MERN Stack, REST API Integration, JSON, Responsive Web Design

Databases: MySQL, MongoDB

Tools & Platforms: VS Code, Git, GitHub, Postman

Concepts: Data Structures & Algorithms, OOPS, SDLC, Agile Methodology, API Integration, NLP (Basics), Convolutional Neural Networks (CNN) (Basics)

PROJECTS

Mental Health Bot

Tech stack: Python, NLP, Convolutional Neural Networks (CNN) | GitHub

- Developed an AI-driven mental health chatbot using NLP and Convolutional Neural Networks, enabling real-time, empathetic text and voice conversations across multiple intent and emotion categories.
- Built a sentiment analysis and emotional-state tracking pipeline to generate personalized, context-aware responses, improving relevance of chatbot replies over rule-based baselines.
- Designed a crisis-detection module that flags high-risk language patterns in real time and triggers automated alert notifications, reducing manual monitoring effort.

Movie Search & Discovery App

Tech stack: React.js, TMDb API, React Hooks, LocalStorage | GitHub

- Developed a React.js movie search application integrating the TMDb REST API to fetch and display real-time movie details via JSON responses.
- Implemented a Favourites feature using React Hooks and LocalStorage to persist user selections across sessions without a backend database, reducing repeat lookups for returning users.

INTERNSHIP EXPERIENCE

Web Development Intern — Atlanwa Pvt Ltd **Nov 2024 – Dec 2024**

- Built a full-stack To-Do task manager using HTML, CSS, JavaScript, and MySQL, covering both front-end interface and back-end data storage.
- Implemented real-time task status updates and tracking, improving usability and reducing manual status-checking for end users.
- Used Git for version control and followed structured SDLC practices while gaining hands-on exposure to the full front-end-to-back-end development workflow, from UI design to database integration.

In-Plant Trainee — Codebind Technologies

- Completed an in-plant training program focused on core web development technologies and tools in a project-based, team-driven environment.
- Gained practical exposure to HTML, CSS, and JavaScript fundamentals through guided, hands-on training projects.

CERTIFICATIONS

- Programming in Java — NPTEL, IIT (Jan – Apr 2024)
- MERN Stack Development — Imarticus Learning (Jan 22 – Jan 31, 2024)

KEY STRENGTHS

- Strong problem-solving skills, built through consistent practice in data structures and algorithms.
- Quick, independent learner — shipped 2+ full front-end projects outside coursework; adaptable across front-end and back-end tasks.
- Comfortable working across the full SDLC, from requirement understanding and Git-based collaboration to deployment-ready front-end and back-end code.
